

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is a transnational organization consisting of Diesel Engines, Defense Industry goods, Industrial Vehicles, Construction Technologies and Machine Instruments and Mechanization Systems.

Their United States affiliate, Doosan Infracore America Corporation, based in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Ohio houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool department. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer needs.

With a network consisting of over 90 autonomous sellers, the lift truck group supplies quality materials handling equipment to the wide-ranging North American marketplace. Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and sales locations all through Canada and the U.S. The forklift product line impressively includes 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous truck designs range from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest expanding forklift business in the North American market, thanks to their consistency in retaining a high level of consumer service quality and optimum product functioning to all Doosan Infracore Lift Truck users. The U.S. lift Truck division located in Cleveland has a expert team experienced in Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a national machinery expansion project. Initial sales of this manufacturing equipment focused on large business groups, the armed forces and on state-run firms. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for improving quality and product development.

Domestic forklift trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's superior technological enhancements combined with sales success placed them in a position of considerable expansion of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the very competitive North American materials handling market. This joint-venture proved highly lucrative for Daewoo and their lift truck product sales expanded greatly. In 1984, the company finished development of a new facility to help in manufacturing high end value-added products for export. In 1993, the corporation had a global sales network and started exporting designs they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international markets.
